WORK EXPERIENCE

Ankor Software

ankor.io

Frontend Engineer

2022 - 2023

- Design and develop frontend using Typescript, Vue JS and TailwindCSS, where backend is GraphQL.
- Identify and take actions for issues to ensure continuous improvement.
- Interact with back-end systems and cooperate with backend engineers.
- Implement responsive web design principles to ensure the web application renders well across multiple devices (desktop, tablet, mobile).
- Participate in peer code reviews and review others' code when requested.

Renomate App

renomate.app

Frontend React Developer

2021 - 2022

- Design and develop dynamic and responsive web pages using HTML, CSS, JavaScript, and React.
- Create innovative, flexible and user-friendly websites and collaborate with the development team members to find the best solutions to complex problems.
- Ensure all pages are optimised for speed and performance by eliminating unnecessary scripts/styles.
- Experience with RESTful APIs (using JSON format).
- Progress projects and track issues on Jira, resolve them with Agile methodology and get familiar with Scrum and Kanban practice.
- Use version control tools appropriately depending on the task and participate in daily standups and biweekly sprint planning meetings.
- Implement the client-side functionalities using JavaScript and React Framework.
- Communicate with clients and manage ongoing projects and maintenance requests.
- Translate the client's technical requirements into code.

Sadra Computer

sadracomputer.com

Frontend Developer

2020 - 2021

- Turn design pages and specific components into HTML, CSS, and JavaScript.
- Implemented websites and landing pages from concept through deployment.
- Analyse UI/UX design for responsive layout for improved usability.
- Collaborate with product team members to implement new feature developments.
